

Quelya Tokenomics Overview

December 3 2025

Token Name: Quelya (QLYA)

Network: Stellar

Total Supply: 25,000,000,000 QLYA

Issuer Address:

GAAILUYXYY2FIVUACVBHNMUETU2AFHARFDNDKEM6AOCNQTV7M3572FR2

Type: Utility + Governance Token

Mechanism: Deflationary – with Buyback, Burn, and Reinvestment Cycles

The QLYA issuing account is permanently locked, guaranteeing the total supply can never increase.

General Tokenomics

Category	Allocation	Description
Public Sale	20%	Distributed to early supporters to form initial liquidity and ensure decentralization.
Liquidity Pools	40%	Reserved for pool establishment and stable price discovery across Stellar-based pairs (QLYA/XLM, QLYA/USDC, etc.).
Staking & Rewards	10%	Incentives for long-term holders and early contributors. A portion will be time-locked (6 months), and part allocated to promotional airdrops.
Team & Advisors	10%	Allocated for project operations, R&D, and strategic growth. Locked and vested to align with long-term sustainability.
Ecosystem Treasury & Development	19%	Used for future partnerships, liquidity injections, and development – gradually released to support expansion.
Sustainability Reserve	1% (+ 2 % of ongoing protocol revenue)	Hybrid insurance fund—1 % QLYA supply locked by DAO + 2 % of all future XLM/USDC revenue to ensure long-term stability.

How the Sustainability Reserve Works

- Token Component (1 %)
 - Locked in a DAO-controlled wallet on Stellar.
 - Can only be deployed via governance vote.
 - Acts as a last-resort liquidity or emergency fund.
- Revenue Component (2 %)
 - Automatically allocated from all protocol revenue streams: LP fees, yield distributions, and buyback proceeds.
 - Held in XLM/USDC to guarantee liquidity coverage and operational continuity.
 - Strengthens the protocol against market downturns or volatility.

Quelya Pools Tokenomics

Category	Allocation	Description
Liquidity Retention	10%	Remains within each pool to sustain baseline liquidity and deepen the pools.
Buyback & Burn	10–25%	Used for continuous buyback and full or partial burn of QLYA – reducing supply over time.
New LP Creation	45–60%	Reinvested into the LP Factory to expand liquidity coverage with new asset pairs.
Operations & Marketing	10–25%	Covers infrastructure maintenance, operational costs, and promotional campaigns.
Team Compensation	10–15%	Covers the core team responsible for developing, maintaining, and expanding the Quelya ecosystem. This includes founders, developers, security engineers, support staff, and future hires.

Any variable percentages may be subject to current circumstances at that given time and are to be seen as indications. The Quelya team may make future adjustments if needed. Such will be communicated in our official channels.

Presale Revenue Allocation

Category	Allocation	Description
Infrastructure & Maintenance	35%	Node operation, server costs, and backend maintenance.
Development & Listings	25%	Smart contract expansion, DEX/CEX listings, and team resources.
Marketing & Promotion	40%	Awareness campaigns, partnerships, and global outreach.

Any remaining funds post-presale will reinforce the post-ICO liquidity pool.

ICO Revenue Allocation (Indicative)

Category	Allocation	Description
Liquidity Pool Establishment	40%	Core liquidity provisioning across Stellar pairs.
Development & Team	30%	Development, Salaries, and Engineering
Marketing & Community	15%	Used for scaling operations and promoting ecosystem growth.
Buyback & Burn	7.5%	Continuous supply reduction in controlled cycles to maintain price stability.
Operation, Legal, Company costs	7.5%	Used for scaling operations and promoting ecosystem growth.

Note: ICO allocations may adjust slightly depending on market conditions and operational needs. All updates will be communicated transparently to the community.

Vesting Strategy Section

Token Vesting & Unlock Schedule

To ensure long-term stability and aligned incentives, a structured vesting plan governs key allocations. This prevents excessive market impact from large releases and supports sustained ecosystem growth.

Category	Lock Period	Vesting Duration	Notes / Purpose
Team & Advisors	12 months	24-month linear vesting	Gradual release to maintain stability and ensure alignment with project milestones.
Staking & Rewards	3 months	Distributed over 36 months	Continuous emission model rewarding long-term participants and liquidity providers.
Ecosystem Treasury	6 months	DAO-governed gradual unlock	Funds deployed based on governance proposals for ecosystem expansion and partnerships.
Public Sale	None	Immediate liquidity	Fully unlocked at distribution to ensure market entry and accessibility.
Sustainability Reserve (1%)	Permanent	Locked in DAO vault	Only deployable by governance vote for emergency or stabilization measures.

This transparent vesting model ensures controlled token release, long-term alignment, and sustainable ecosystem development.
